## APP \_\_ 2015 \_\_ DESIGN JACOB AMTORP

226

Pouf con smusso che grazie alla sua particolare forma permette di creare innumerevoli composizioni. Il fusto è realizzato in composto di fibra di legno pressato e abete massello, di prima scelta, libero da alburno, spaccature, tarlature o altri difetti. La percentuale d'umidità di equilibrio non supera il 10%. Il fusto è rivestito lateralmente con 1 cm di gomma (poliuretano espanso) HR (High Resilience) ignifuga con una densità di 65 kg/m<sup>3</sup>, 8 kPa, e nella parte superiore con 5 cm di gomma (poliuretano espanso) HR (High Resilience) ignifuga con una densità di 65 kg/m<sup>3</sup>, 8 kPa, e uno strato di dacron (ovatte sintetiche termolegate) da 100 grammi/m<sup>3</sup>. La gomma ignifuga (poliuretano espanso ignifugo) è del tipo CMHR (Combustion Modified High Resilient) e risponde alle norme British Standard (BS), Cal 117, Classe 11M, nonché ad altri standard su richiesta (per esempio le norme tedesche DIN o le norme francesi NF). Il comfort del pouf deriva dalla gomma utilizzata. Non ci sono cinghie elastiche.

*Pouf avec chanfrein qui, grâce à sa forme particulière, permet de créer de nombreuses compositions. La carcasse est faite de fibre composée de bois pressé et sapin massif, premier choix, sans aubier, fissures, trous de vers ou autres défauts. Le pourcentage d'humidité à l'équilibre ne dépasse pas 10%. La carcasse est latéralement recouverte d'1 cm de mousse à froid (mousse de polyuréthane) HR (High Resilience) ignifuge avec une densité de 65 kg/m<sup>3</sup>, 8 kPa et sur la partie supérieure de 5 cm de mousse à froid (mousse de polyuréthane) HR (Haute Résilience) ignifuge avec une densité de 65 kg/m<sup>3</sup>, 8 kPa, et une couche de dacron (ouate synthétique thermolée) de 100 grammes/m<sup>3</sup>. La mousse à froid ignifuge (mousse de polyuréthane ignifuge) est du type CMHR (Combustion Modified High Resilience) et répond aux normes British Standard (BS), Cal 117, Classe 11M, ainsi qu'à d'autres normes (par exemple aux normes allemandes DIN ou normes françaises NF) sur demande. Il comfort del pouf deriva dalla gomma utilizzata. Non ci sono cinghie elastiche. Le confort du pouf vient de la mousse à froid utilisée. Il n'y a pas de sangles élastiques. Il rivestimento è fissa, sia in tessuto che in finta pelle che in pelle. Le revêtement est fixe, en tissu comme en similicuir comme en cuir.*

*Pouf with chamfer that thanks to its particular shape lets you create innumerable compositions. The frame is made of composite fiber pressed wood and solid pine, first choice, free from sapwood, cracks, wormholes or other defects. The percentage of the equilibrium moisture does not exceed 10%. The frame is laterally covered with 1 cm of polyurethane foam HR (High Resilience) fire retardant with a density of 65 kg/m<sup>3</sup>, 8 kPa, and at the top with 5 cm polyurethane foam HR (High Resilience) fire retardant with a density of 65 kg/m<sup>3</sup>, 8 kPa, and a layer of dacron (synthetic thermobonded wadding) of 100 grams/m<sup>3</sup>. The fire retardant polyurethane foam is of the type CMHR (Combustion Modified High Resilient) and meets the British Standard (BS), Cal 117, Class 11M standards, as well as other standards on request (for example, the German DIN standards or the French NF standards). The comfort of the pouf comes from the polyurethane foam used. There are no elastic belts. The upholstery is fixed, in fabric as well as in artificial leather as well as in leather.*

*Пуф со скошенной гранью, который благодаря своей необычной форме позволяет создавать бесчисленные конфигурации. Каркас выполнен из прессованного древесного волокна в сочетании с отборным массивом ели без заболони, трещин, червоточин и иных дефектов. Значение равновесной влажности не превышает 10%. Сбоку каркас отделан слоем в 1 см из высокоупругого огнеупорного вспененного полиуретана (плотность 65кг/м<sup>3</sup>, предел прочности 8кПа), а в верхней части такой же слой, но в 5 см и в сочетании со слоем дакрона (плотность 100г/м<sup>3</sup>). Высокоупругий трудновоспламеняемый вспененный полиуретан категории CMHR (Combustion Modified High Resilient), соответствует всем необходимым нормам и стандартам (английский British Standard (BS), американский Технический бюллетень 117 (Cal 117), класс эмиссии M1, Немецкий институт по стандартизации (DIN), французский орган по сертификации (NF). Комфорт пуфа обеспечивается за счет наполнения из полиуретана. Эластичные ремни не используются. Обивка несъемная, как в ткани, так и в коже, натуральной или искусственной.*

*Hocker mit Fase, der dank seiner besonderen Form ermöglicht, zahlreiche Kompositionen zu erstellen. Das Gestell ist gemacht aus Komposit von gepressten Holzfasern und massiver Fichte, erste Wahl, frei von Splint, Rissen, Wurmlöchern oder anderen Mängeln. Der Gleichgewichtsfeuchtigkeitsgehalt überschreitet die 10% nicht. Das Gestell ist auf der Seite bekleidet mit 1 cm PU-Schaum HR (High Resilience) schwer brennbar mit einer Densität von 65 kg/m<sup>3</sup>, 8 kPa, und oben mit 5 cm PU-Schaum HR (High Resilience) schwer brennbar mit einer Densität von 65 kg/m<sup>3</sup>, 8 kPa, und einer Schicht von Dacron (thermisch gebundener synthetischen Watte) von 100 g/m<sup>3</sup>. Der schwer brennbare PU-Schaum ist vom Typ CMHR (Combustion Modified High Resilient) und entspricht den Normen British Standard (BS), Cal 117, Classe 11M und, auf Anfrage, auch anderen Normen (zum Beispiel den deutschen DIN-Normen oder den französische NF-Normen). Der Komfort des Hockers kommt aus dem gebrauchten PU-Schaum. Es gibt keine elastischen Gurten. Die Polsterung ist fest, sowohl in Stoff als in Kunstleder als in Leder.*

# STRIPES \_\_ 2009 \_\_ DESIGN JÉRÔME GAUTHIER

242

La collezione STRIPES, creata dal designer Jérôme Gauthier, è ispirata alle tipiche panchine a doghe in legno orizzontali utilizzate nei parchi pubblici parigini ed è caratterizzata dalla trapuntatura a righe (da cui viene il nome "Stripes"). Stripes è un modello testato fonoassorbente ed è conforme ai test BIFMA statunitensi. Per favorire l'ergonomia e la comodità del prodotto, lo schienale è dotato di un poggiatesta con un angolo di inclinazione di ca. 22° in modo tale che non sono necessari cuscini per garantire il comfort. Seduta, schienale e braccioli sono composti da un fusto in pannelli di multistrato da 20 e 40 mm di prima scelta. La resistenza del fusto è garantita da una costruzione ad incastri che offre elevate garanzie di tenuta. La seduta, priva di cinghie elastiche intrecciate, è in poliuretano espanso CM 40/P kg/m<sup>3</sup> 5,9 kPa e rinforzi con SR75 Kg/m<sup>3</sup> 15,5 kPa. Schienale e poggiatesta sono in poliuretano espanso CM 40 kg/m<sup>3</sup> 5,9 kPa. Il fusto e i braccioli sono rivestiti in poliuretano espanso, con una densità di 40 kg/m<sup>3</sup> 5,9 kPa e 75 kg/m<sup>3</sup> 15,5 kPa. Per garantire la durabilità del prodotto nel tempo nei punti maggiormente soggetti a deformazione vengono utilizzati degli aggregati di poliuretano espanso della densità complessiva di 200 kg/m<sup>3</sup>, sotto cui è montata una piastra di metallo da 40 x 5 mm. La parte esterna del fusto è inoltre rivestita in fibra termolegata di 250 gr. I braccioli sono fissati tramite bulloni e baionette. Il poliuretano espanso è sempre ignifugo CMHR (Combustion Modified High Resilient) e risponde alle norme British Standard (BS), Cal 117, Classe 11M, nonché, su richiesta, ad altri standard (per esempio le norme tedesche DIN o le norme francesi NF). Le caratteristiche righe ("stripes" in inglese), orizzontali o verticali, sono ottenute tramite una trapuntatura che accoppia non solo il rivestimento (tessuto, finta pelle o pelle) e il dacron, ma anche un strato di gomma con uno spessore di 1 cm. Ogni riga è alta 8 cm. Il rivestimento del modello Stripes è sempre fisso, sia in tessuto che in pelle e finta pelle.

*The STRIPES collection, created by the designer Jérôme Gauthier, was inspired by the typical wooden horizontal slat benches used in public parks in Paris and is characterized by the stripes quilting, that is where the name "Stripes" comes from. Stripes is a tested sound absorbing model and complies with the U.S. BIFMA standards. In order to enhance the ergonomics and the comfort of the product, the backrest is equipped with a low back support with an inclination angle of about 22 degrees, so that no further cushions are needed to ensure the sofa comfort. Seat, backrest and arms have a frame made of 20 and 40 mm multi-ply wooden panels of the highest quality. The frame resistance is guaranteed by a joint construction. The seat, which is not equipped with interwoven elastic belts, is made of polyurethane foam CM 40/P kg/m<sup>3</sup> 5,9 kPa, with supports in foam SR75 Kg/m<sup>3</sup> 15,5 kPa. Backrest and low back support are made of polyurethane foam CM 40 kg/m<sup>3</sup> 5,9 kPa. Frame and arms are upholstered with polyurethane foam with a density of 40 kg/m<sup>3</sup> 5,9 kPa and 75 kg/m<sup>3</sup> 15,5 kPa. The presence of polyurethane aggregates with an overall density of 200 kg/m<sup>3</sup>, under which there is a 40 x 5 mm metal plate, ensure the product durability over time in the areas which are more subject to deformation. The external frame side is also lined with a 250 gr. thermo-bonded fibre. The arms are fixed by means of bolts and bajonet joints. The polyurethane foam is always CMHR fire-retardant (Combustion Modified High Resilient) according to the British Standard regulations (BS), Cal 117, Class 11M, or, on demand, according to other regulations (such as the German DIN or the NF French regulations). The typical stripes, which can be horizontal or vertical, are obtained through a quilting process which couples not only the cover material – fabric, artificial leather or leather, wick dacron, but also a 1 cm thick foam layer. Each stripe is 8 cm high. Fabric, artificial leather and leather covers are always fixed.*

*Die Kollektion STRIPES, gezeichnet vom Designer Jérôme Gauthier, lehnt sich an die typischen Fassdaubenbänken in den Pariser Parks und ist durch die Streifenabsteppung – daher der Name « Stripes », gekennzeichnet. Stripes ist ein schallabsorbierendes, getestetes Modell und besteht die US-BIFMA Tests. Die Ergonomie und der Sitzkomfort des Produkts werden durch die in der Rückenlehne eingearbeitete Nierenschütze gefördert. Diese hat eine Neigung von ca. 22°, so dass zusätzliche Kissen nicht benötigt werden, um die Bequemlichkeit und den Sitzkomfort dieses Produkts zu gewährleisten. Sitz, Rückenlehne und Seitenteile bestehen aus einem Gestell aus Schichtholzplatten mit einer Dicke von 20 und 40 mm von höchster Qualität. Die Haltbarkeit des Gestells wird durch eine Steckkonstruktion gewährleistet. Die Sitzfläche, ohne geflochtene Gummigurtung, besteht aus Polyurethan-Schaumstoff CM 40/P kg/m<sup>3</sup> 5,9 kPa, mit Verstärkung in SR75 Kg/m<sup>3</sup> 15,5 kPa. Rückenlehne und Nierenschütze sind mit Polyurethan-Schaumstoff CM 40 kg/m<sup>3</sup> 5,9 kPa gepolstert. Gestell und Seitenteile sind mit Polyurethan-Schaumstoff mit einer Dicke von 40 kg/m<sup>3</sup> 5,9 kPa und 75 kg/m<sup>3</sup> 15,5 kPa gepolstert. Die Verwendung von Polyurethan-Schaumstoff-Aggregaten mit einer Gesamtdichte von 200 Kg/m<sup>3</sup> in den Punkten, die der Verformung mehr ausgesetzt sind, sichert die Dauerhaftigkeit des Produktes für lange Zeit. Darunter wird zusätzlich eine Metallplatte 40 x 5 mm befestigt. Die Aussenseiten des Gestells sind zusätzlich mit einer Ummantelung aus thermogebundenen Fasern mit Gewicht 250 Gr. ausgestattet. Die Seitenteile sind mittels Schrauben und Bajonettverschlüssen befestigt. Der Polyurethan-Schaumstoff ist immer schwerentflammbar CMHR (Combustion Modified High Resilient), gemäß British Standard (BS), Cal 117, Klasse 11M, oder, auf Anfrage, gemäß anderen Standards, wie beispielsweise den deutschen DIN-Normen oder den französischen NF-Normen. Die typischen Streifen – Stripes –, die horizontal oder vertikal ausgeführt werden können, erhält man nicht nur durch die Verbindung des Bezugsmaterials – Stoff, Leder oder Kunstleder – mit Dacron, sondern es wird hier auch Schaumstoff mit einer Dicke von 1 cm eingearbeitet. Jeder Streifen ist 8 cm hoch. Die Modelle der Serie Stripes sind immer festbezogen.*

# STRIPES \_\_ 2009 \_\_ DESIGN JÉRÔME GAUTHIER

243

*La collection STRIPES, créée par le designer Jérôme Gauthier, est inspirée par les banquettes à lattes de bois horizontales utilisées dans les parcs publics parisiens et est caractérisée par le matelassage à rayures (d'où le nom "Stripes"). Stripes est un modèle testé insonore et est conforme aux tests étasuniens BIFMA. Pour faciliter l'ergonomie et le confort du produit, le dossier est équipé d'un support lombaire avec un angle d'inclinaison d'environ 22° de telle sorte que des coussins lombaires ne sont pas nécessaires pour assurer le confort. L'assise, le dossier et les accoudoirs sont composés d'une carcasse en panneaux de multiplis de 20 et 40 mm de premier choix. La résistance de la carcasse est assurée par une construction avec des joints qui offre des garanties élevées de durée de vie. L'assise, qui n'a pas de sangles élastiques entrecroisées, est en mousse de polyuréthane CM 40/P kg/m<sup>3</sup> 5,9 kPa et renforts avec SR75 kg/m<sup>3</sup> 15,5 kPa. Le dossier et les accoudoirs sont en mousse de polyuréthane CM 40 kg/m<sup>3</sup> 5,9 kPa. La carcasse et les accoudoirs sont revêtus de mousse de polyuréthane avec une densité de 40 kg/m<sup>3</sup> 5,9 kPa et 75 kg/m<sup>3</sup> 15,5 kPa. Afin d'assurer la durabilité du produit dans le temps au niveau des points les plus sujets à la déformation, des agrégats de mousse de polyuréthane d'une densité globale de 200 kg/m<sup>3</sup> sont utilisés, sous lesquels est montée une plaque métallique de 40 x 5 mm. En plus, l'extérieur de la carcasse est revêtu de dacron de 250 grammes. Les accoudoirs sont fixés à l'aide de boulons et baionnettes. La mousse de polyuréthane est toujours ignifuge CMHR (Combustion Modified High Resilient) et répond aux normes British Standard (BS), Cal 117, Classe 11M, ainsi que, sur demande, à d'autres normes (par exemple les normes allemandes DIN ou les normes françaises NF). Les rayures ("stripes" en anglais) caractéristiques, horizontales ou verticales, sont obtenues grâce à un matelassage qui couple non seulement le revêtement (tissu, similicuir ou cuir) et le dacron, mais aussi une couche de mousse de polyuréthane avec une épaisseur d'1 cm. Chaque rayure est haute 8 cm. Le revêtement du modèle Stripes est toujours fixe, aussi bien en tissu qu'en similicuir qu'en cuir.*

*De collectie STRIPES, gecreëerd door ontwerper Jérôme Gauthier, is geïnspireerd op de typische bankjes met horizontale houten latten die men in de Parijse openbare parken vindt en wordt gekenmerkt door de doorstikking in streepvorm (vandaar de naam "Stripes"). Stripes is een model dat getest is op zijn geluidsabsorberendheid en is conform aan de BIFMA-tests uit de Verenigde Staten. Om de ergonomie en het comfort van het product te bevorderen, is de rugleuning voorzien van een lendensteun met een hellingshoek van ca. 22°, zodat geen lendenkussentjes nodig zijn om het comfort te waarborgen. Zit, rug en armleningen bestaan uit een romp van eerste keus multiplexpanelen van 20 en 40 mm. De stevigheid van de romp wordt gewaarborgd door een pen- en gatconstructie die garant staat voor een lange levensduur. Zit, rug en armleningen bestaan uit een romp van eerste keus multiplexpanelen van 20 en 40 mm. De stevigheid van de romp wordt gewaarborgd door een pen- en gatconstructie die garant staat voor een lange levensduur. De zit, zonder door elkaar gekruiste elastische banden, is uitgevoerd in polyurethaanschuim van het type CM 40/P kg/m<sup>3</sup> 5,9 kPa en verstevingen in polyurethaanschuim van het type SR75 kg/m<sup>3</sup> 15,5 kPa. Rug en lendensteun zijn uitgevoerd in polyurethaanschuim van het type CM 40 kg/m<sup>3</sup> 5,9 kPa. De romp en de armleningen zijn bekleed met polyurethaanschuim met een densiteit van 40 kg/m<sup>3</sup> 5,9 kPa en 75 kg/m<sup>3</sup> 15,5 kPa. Om de duurzaamheid van het product op lange termijn te waarborgen, wordt op de plaatsen die het meest onderhevig zijn aan vervorming samengesteld polyurethaanschuim met een algemene densiteit van 200 kg/m<sup>3</sup> gebruikt, waaronder een metalen plaat van 40 x 5 mm gemonteerd wordt. De buitenkant van de romp wordt daarenboven bekleed met dacron van 250 gram. De armleningen worden bevestigd met behulp van bouten en bajonetten. Het polyurethaanschuim is altijd brandvertragend van het type CMHR (Combustion Modified High Resilient) en beantwoordt aan de normen British Standard (BS), Cal 117, Classe 11M, alsook, op aanvraag, aan andere normen (bijvoorbeeld aan de Duitse DIN-normen of aan de Franse NF-normen). De typische strepen ("stripes" in het Engels), horizontaal of verticaal, worden verkregen door een doorstikking die niet alleen de bekleding (stof, kunstleer of leer) en de dacron, maar ook een laag polyurethaanschuim met een dikte van 1 cm aan elkaar koppelt. Elke baan is 8 cm hoog. De bekleding van model Stripes is altijd vast, zowel in stof als in kunstleer als in leer.*

*Отличительной особенностью коллекции STRIPES от французского дизайнера Жерома Готье (Jérôme Gauthier) является наличие характерной стежки в полосу (отсюда и название STRIPES), а прообразом послужили скамейки на основе горизонтальных деревянных реек - неизменные спутники парижских общественных парков. Артикулы коллекции Stripes прошли испытание на необходимый уровень звукопоглощения и соответствуют американскому стандарту BIFMA (единая база стандартизации по безопасности, долговечности и рабочих функций тестируемого изделия). Для большей эргономичности и удобства нижняя часть спинки, соприкасающаяся с поясницей, имеет угол наклона в 22°, что позволяет обеспечить комфорт, не используя дополнительные подушки. Каркас сиденья, спинки и подлокотников выполнен из панелей «мультистрато» - многослойной фанеры высшего качества толщиной от 20 до 40мм. Прочность каркаса обусловлена его жесткой конструкцией, обеспечивающей повышенные гарантийно-эксплуатационные качества. Наполнение сиденья из вспененного полиуретана CM плотностью 40/P кг/м<sup>3</sup> 5,9 кПа со вставками из вспененного полиуретана SR плотностью 75 Кг/м<sup>3</sup> 15,5 кПа, без эластичных перекрещивающихся ремней. Наполнение спинки и нижней части спинки, соприкасающейся с поясницей из вспененного полиуретана CM плотностью 40/P кг/м<sup>3</sup> 5,9 кПа Каркас и подлокотники с покрытием из вспененного полиуретана общей плотностью 40 кг/м<sup>3</sup> 5,9 кПа и 75 кг/м<sup>3</sup> 15,5 кПа. Для обеспечения максимально длительного срока эксплуатации на участках, где чаще всего могут возникнуть деформации используется наполнение из вспененного полиуретана общей плотностью 200 кг/м<sup>3</sup> в сочетании с поддерживающей металлической пластиной 40 x 5 мм. Внешняя часть каркаса отделана слоем из термостойкого волокна 250г/м<sup>3</sup>. Крепление подлокотников на болтах и при помощи байонетного соединения. Высокоупругий трудновоспламеняемый вспененный полиуретан категории CMHR (Combustion Modified High Resilient), соответствует всем необходимым нормам и стандартам (английский British Standard (BS), американский Технический бюллетень 117 (Cal 117), класс эмиссии М1, Немецкий институт по стандартизации (DIN), французский орган по сертификации (NF). Характерные для данной коллекции вертикальные либо горизонтальные полосы ("stripes" по-английски) получаются в результате прострочки, которая соединяет не только обивку (ткань, кожа, искусственная или натуральная) и dacron, но также захватывает и слой полиуретана толщиной 1см, таким образом, каждая полоса имеет высоту 8см. Все артикулы коллекции STRIPES имеют несъемную обивку, как в ткани, так и в коже, искусственной либо натуральной.*
